### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I: Figures 2 and 3-1<sup>st</sup> embodiment of cap

Species II: Figure 5 & 6-2<sup>nd</sup> embodiment of cap

Species III: Figure 9-2<sup>nd</sup> embodiment on sealing body

Species IV: Figures 10-14-3<sup>rd</sup> embodiment on sealing body

Species V: Figures 15-16-4<sup>th</sup> embodiment on sealing body

Species VI: Figure 17-5<sup>th</sup> embodiment on sealing body

Species VII: Figures 20 and 21-3<sup>rd</sup> embodiment on cap

Species VIII: Figures 22 and 23-4<sup>th</sup> embodiment on cap

Species IX: Figure 25 and 26-5<sup>th</sup> embodiment on cap

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 4138

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-4 and 17-18: Species I

Claims 5: Species II

Claims 6: Species III

Claim 7 and 8: Species IV

Claim 9: Species V

Claim 10: Species VI

Claims 13 and 14: Species VII

Claim 15: Species VIII

Claim 16: Species IX

The following claim(s) are generic: Claim 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The invention shows several embodiments of the cap closure of the inhaler which all have different technical features. The embodiments include closing by means of a tear-off foil with an attachable part of a cap; removing tear-of foil after attaching an attachable part of a cap; cap and compartment made of squeezable material and adapted to rupture when pressure applied to cap; cap accommodating two or more tubular bodies; and a cap comprising two closed compartments where each contain a separate, inhalable substance. The invention also shows several embodiments of sealing the closed compartment which include closing the body by attaching the cap and then bending the tubular body and unbending the tubular body to open the compartment; sealing the closed compartment by squeezing a part of the body and then removing it to close compartment; and a body where one end is permanently closed and other end inserted in body and closing accomplished by sticking part of walls of body together and opening accomplished by supplying pressure or pulling body.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
